

Dear Provider,

The MyoPro is a custom myoelectric arm brace that is designed to help patients regain meaningful upper extremity function. If you determine the MyoPro is appropriate for your patient, a Face-to-Face chart note documenting medical necessity for the orthotic brace is required.

Progress Note Requirements for Medical Necessity
1. Endorsement that the MyoPro is medically necessary for patient based on your face-to-face evaluation
2. Previous rehabilitation treatment (e.g., PT, OT, bracing, e-stim, Botox) has not restored meaningful arm function
3. Patient needs the MyoPro to increase independence with ADLs (dressing, toileting, hygiene, self-feeding, etc.)

Supplemental Documentation in Physical Exam:

- Documentation of arm weakness (e.g., strength grades: 1/5, 2/5)
- Spasticity (mild, moderate, severe)
- Grossly normal passive range of motion
- Shoulder subluxation: None or less than 2 finger widths
- Pain managed in upper extremity (if applicable)
- Intact cognition

Please contact our Customer Experience Department at 888-669-1033 for further assistance.

Thank you for your time and efforts to support our patient.
